

## Newsletter n°12 - 16 May 2022

## **EDITORIAL NOTE**

Europe and European industries face high energy prices, uncertain energy supply and disruption in the supply chain of raw materials.

ewsletter

Raw materials are an essential ingredient for the energy transition. The EU regulatory framework needs to address the huge supply gap the EU faces in securing raw materials.

Europe must invest in innovation so that recycling will help improving the EU's raw materials resilience and thus the transition to a more sustainable way of producing energy.

Jan Van der Putten

## efca newsroom
