

## ■ EFCA is fully supporting the FIEC position paper

- Dominant position and impact on our productivity gain
- Programmed obsolescence
- The construction industry has to keep the control on software specifications
- The European Commission to take care on the real competition matters

## ■ EFCA Supporting this initiative to develop European autonomy

- Technical specification according to European regulation
- Control on the data storage and recovering
- Open BIM, Open Gis and openSource

## ■ EFCA requirements

- Intellectual property protection :
  - Digital twin and new type of deliverable : digital services
- Keep the control of services:
  - Cloud computing and services based on Open BIM

## Next steps

- develop the European industry's policy statement on the use of cloud services, bringing special focus to issues related to security, financial concerns and economic sustainability, classification, data ownership & transfer, access/user/storage rights, and regulation
  - **As member of the EU project 856943 - DigiPLACE**
- organise action and debate on EFCA and FIEC recommendations to positively influence policy makers at national/European level
